## Announcing New Handheld Cable

### Overview

Datalogic Scanning is pleased to announce the availability of a new cable to connect all Datalogic heritage products supporting the RS-232 serial interface to the AUX port of Magellan products.

### Features and Benefits

The following cable represents a new opportunity for customers to select their preferred scanner to connect to our Magellan products. Datalogic Scanning offers the most complete portfolio of handheld scanners. Customers can now select a companion scanner to the Magellan from the widest array of products: from contact to distance, from linear imager to laser, from hand held to presentation mode, from 1D to PDF to 2D, from corded to cordless, and from entry level to top performing product.

Part Number	Description
90G001092	CAB-362 SH3924-SERIAL CABLE FOR MAGELLAN
