

Product: Gryphon™ I GM4100

General Availability: October 21, 2009

Product Bulletin Number: PB20091007

Public Announcement: October 30, 2009

Dated: October 7, 2009

Introducing the 910 MHz Models of the Gryphon™ I GM4100 Linear Imager with Display, 3-Key Keypad and the Datalogic STAR Cordless System™

Overview

Datalogic Scanning is happy to announce that the Gryphon I GM4100 cordless handheld imager will soon be available with 910 MHz communication models.

The Gryphon GM4100 linear imager provides mobility in a snappy, reliable handheld scanner with a unique two position charging base station. The Gryphon I GM4100 linear imager is for customers requiring longer range connection and reliable data transmission in a high performance bar code reader.

The Gryphon I GM4100 offers these superior features:

- Datalogic STAR Cordless System with low sensitivity to obstacles and no risk of interference with Wi-Fi infrastructures
- Datalogic's patented 2-position cradle with 'Scan-While-Charging' capability can also act as a presentation scanner during the charging process
- Optional display with 3-key keypad
- Batch Mode capability (able to store more than 1200 codes in memory)
- Datalogic's patented 'Green Spot' for good-read feedback
- Long lasting user-replaceable Lithium-Ion battery

All of these features in a single solution provide the richest feature set among general purpose product offerings.

Please refer to **Product Bulletin PB20090508** for further information relating to this product.

Please note:

- The Gryphon I GM4100 will replace the Gryphon M100 910 MHz and related base stations.
- The Gryphon M200 910 MHz will continue to be available for reading PDF417 codes.

A separate Sales Bulletin will be issued at a later date to inform Sales and Partners about newly obsoleted part numbers.
